GREENWICH SEAT COVER RANGE

SS5506 - Red

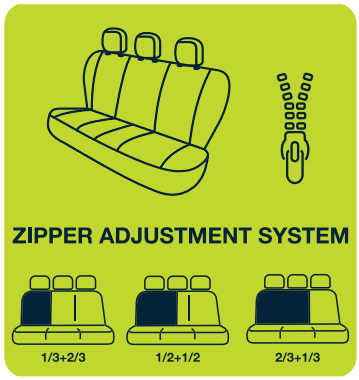

SS5507 - Blue

SS5508 - Grey

MODULAR ZIP DESIGN

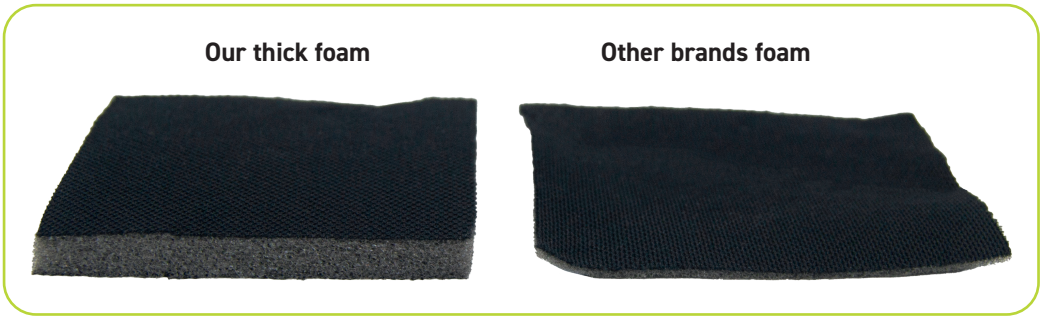

The zippers allow the user to add or remove the central panel of the seat cover, providing the best fit for their vehicle. This makes the cover adaptable to both smaller cars and larger SUVs. Additionally, the zippers can be left undone, making it easy to fold the seats without having to remove the cover.

THICK FOAM

The seating surface is designed with a 8mm foam, adding a thick layer of cushioning that ensures maximum comfort and support, even on extended journeys. This additional padding helps reduce fatigue, making it ideal for both everyday commutes and long road trips.

AIRBAG COMPATIBLE

The seat covers are expertly designed to be fully airbag compatible, ensuring that they will not restrict the deployment of airbags in the event of an accident. With specialized side panels, these covers allow airbags to pass through safely and seamlessly during activation, maintaining the integrity of the vehicle's safety system.
