## 4A SLIM COMPACT SMART BATTERY CHARGER

**NEW**

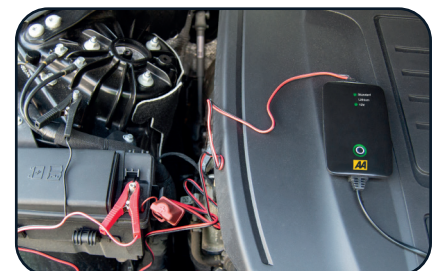

The AA 4A Slim Compact Smart Battery Charger is an intelligent charging solution designed to keep your battery in top condition. Featuring battery clips & ring terminals for easy connectivity and a convenient hanging hook for effortless storage, it offers both Standard Battery Charge Mode and Lithium Battery Charge Mode, allowing you to switch between them as needed.

Compatible with rechargeable 12V lead-acid, calcium, gel, START/STOP, AGM, and EFB batteries with 6 cells, as well as Lithium (LiFePO4) batteries, this smart charger automatically adjusts the charge rate, stopping when the battery is full to prevent overcharging. As the battery naturally discharges, the charger reactivates to maintain full capacity, ensuring long-term battery health.

This compact yet high-performance charger provides a safe, efficient, and hassle-free way to keep your 12V batteries charged and ready to go.

- Connectors – battery clips and ring terminals
- Works with lead-acid and lithium batteries
- Smart technology
- Compact and convenient
- Sleek glossy finish and premium build quality
