

## JUMP STARTER 1000 A

**NEW**

The AA Jump Starter 1000 A is designed to get you back on the road quickly and safely. With a 10,400 mAh lithium cobalt battery, it delivers up to 500 A starting current and 1000 A peak current, making it suitable for a wide range of vehicles.

Beyond jump starting, it doubles as a portable power bank with dual USB outputs, allowing you to charge smartphones, tablets and other devices on the go. The built-in multi-function LED light provides solid, SOS and strobe modes meaning it is ideal for emergencies and roadside use.

Safety is at the core of this unit, with reverse polarity, short circuit, over-discharge and over-heat protection built in. The unique rubberised tyre-tread housing is both durable and easy to handle, while its compact size makes it simple to store in your car.

Reliable, practical and versatile, this jump starter is the perfect companion for drivers who want peace of mind wherever the road takes them.
