BATTERY TESTER

The CTEK BATTERY TESTER delivers fast, reliable diagnostics for 12 V and 24 V batteries and battery systems in any vehicle. Its intuitive colour display guides you through battery, cranking and charging system tests – giving clear results you can act on. Supporting all lead-acid battery types, it's built to perform.

CTEK BATTERY TESTER is your go-to tool for fast, accurate battery diagnostics. Whether you're a vehicle enthusiast or a workshop needing reliable testing, it delivers quick results in a compact, easy-to-use package. The 2.8" colour display presents clear verdicts, while comprehensive testing covers battery health, charge status, internal resistance, cranking performance and charging system output. It works with virtually any lead-acid 12 V or 24 V battery or battery system – including Regular Flooded, AGM, GEL and EFB – and supports 10 battery rating standards including CCA, EN and DIN. Simply connect the clamps and follow the on-screen prompts – the tester powers itself from the battery. No fuss, no guesswork. Just accurate answers, backed by CTEK's expertise in battery care.

- Complete battery, cranking & charging system diagnostics.
- Works with both 12 V and 24 V batteries.
- Clear colour display with instant pass/fail results.

BATTERY TESTER PRO

The CTEK BATTERY TESTER PRO delivers advanced diagnostics for workshops and professionals. Test 12 V and 24 V lead-acid batteries and battery systems and review results on a 2.8" colour display. Print professional reports directly from the built-in printer – everything you need for transparent customer service.

Every diagnosis tells a story – and the CTEK BATTERY TESTER PRO helps you tell it clearly. Go beyond simple pass/fail verdicts with detailed insights into internal resistance, state of health and state of charge. The ripple voltage test pinpoints charging system issues, while cranking analysis reveals starter motor strain before it becomes a breakdown. With 10 international battery rating standards supported, you'll get accurate readings whether you're testing a compact city car or a commercial fleet vehicle. The intuitive interface means less time learning and more time earning. Connect the clamps, follow the prompts, and let the results speak for themselves. It's the professional upgrade that makes battery diagnostics a revenue opportunity, not just a routine check.

- Ripple voltage testing identifies alternator and charging faults.
- Supports 10 international standards for accurate global testing.
- Intuitive interface – minimal training, maximum productivity.
